Rego Foundation unlocks the potential of young women and girls through entrepreneurship and technology.

Sheboss

A full-stack E-commerce website for a social venture.

EXPERIENCE

Software Developer

A23 Labs | Mar 2021 - May 2024

- Participate in design and architecture of new application and new features.
- Consult with clients regularly regarding projects, proposals, and technical issues that arise during the development process.
- Modify existing software to detect and correct errors, improve performance, and upgrade interfaces.
- Lead version control efforts for A23 Labs, employing GitHub and other public and open source repositories.

Accomplishments:

- I was part of a team from A23Labs and Jambule that built a biometric based web and mobile time and attendance system currently used by over 850 field officers from Save the Children(an International NGO). The system has led to a 58% decrease in cost of production by preventing ghost officers from accessing funds for no work done.
- I have leveraged my experience to successfully build a full stack personal project that I am proud of. Regonow automates group savings and empowers communities to build their wealth together. (<https://rego-now.com>)

Founder / Team Lead

Rego Foundation | 04/2016 - Present

- Spearhead efforts to lobby for funds; bring in new partners and participants.
- Collaborate and supervise 3 program coordinators, support staff & volunteers.
- Prepare program budgets. Administer approved sums. and ensure that agreed-upon allocations are followed.
- Ensure program compliance with state and local regulations.
- Analyse data to anticipate and forecast future program needs.

Accomplishments:

- Recognised among top 100 women doing honourable work in Uganda in 2021. #100WomenFixingUganda
- Saw a 40% increase in job creation by and for women benefactors in 2021.
- Launched a web development bootcamp for young women in underserved communities
